

Squeeze Group is the most prestigious Japanese ICT company and categorized hotel management company.

*Hotel Management Company is those who manage the hotel, but do not own the hotel.

*Hotel owner is those who legally own the land or the hotel assets

Established in 2014, SQUEEZE Group has been committed to lead Hospitality Tech industry in Japan. Our solutions are designed specifically for hotels and individual property owners to maximize revenue while minimizing resources for the existing operation. Not only having supported thousands of hotels, we currently have own hotel brand 'Minn', 'Theatel' and a boutique hotel 'UMITO.'

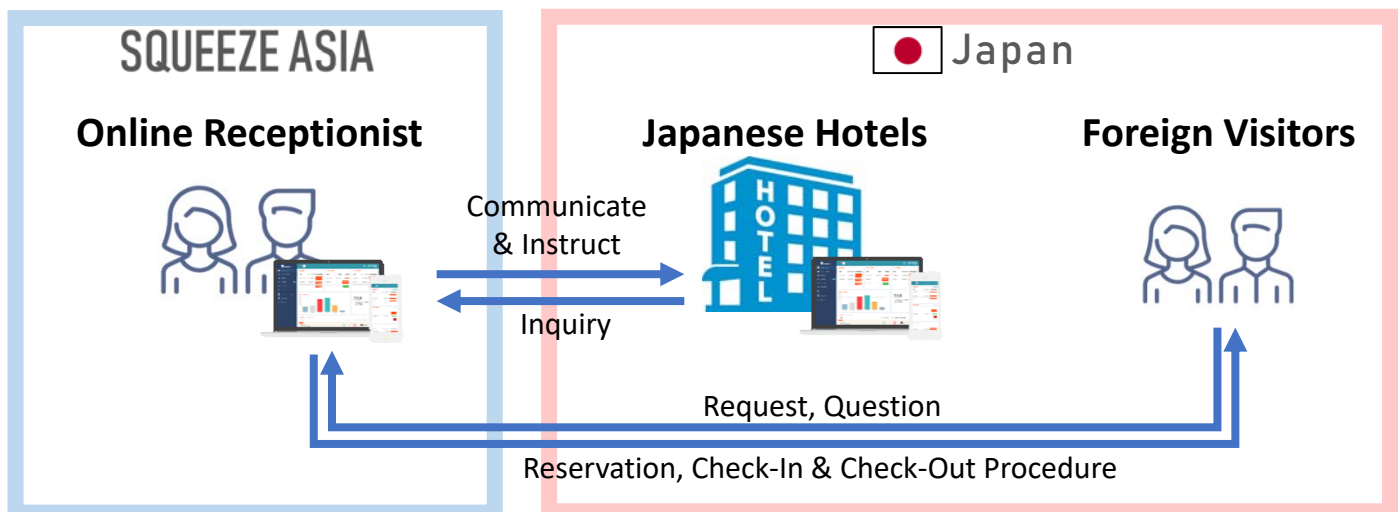

Squeeze Asia is established as the base for the whole Asia region. We will start-up the service from April 2019 and need individuals who are interested in hospitality and are able to communicate with foreigners.

Like other hotel management companies, **Squeeze Asia has no plan to own its hotel.** At first, we will focus on the reception service to hundreds of Japanese hotels for foreign visitors who speak English and Japanese.

Our Service at first (April 2019)

*One day, people all over the world will study
hospitality from Cambodians.*

Squeeze Asia is planning to start exchange program with Squeeze Inc. and Japanese hotels by the end of 2019. We are also planning to start new services not only for Japanese hotels but also hotels in other countries in the near future.

We will do our best so that people all over the world will notice how great hospitality Cambodians have.

We are very happy if we can cooperate together for the purpose!
